

SIMPLE BIBLE STUDY

IN 3 STEPS

Use this technique to help lead a simple yet very effective bible study.

STEP 1:

Choose a book of the Bible to Review

STEP 2:

Start at the beginning of the book, read about 200 words aloud from that book each time you gather.

(This could be approximately a chapter or two depending on the book. A simple way to measure is to read the distance between your extended thumb and pinky when laid upon the page of an average sized bible. Choose the most logical stopping place within that range.)

STEP 3:

Discuss aloud the answers to the following Questions:

1. What did you like about what we just read?
2. What didn't you like?
3. Was there anything you didn't understand?
4. What did you learn about God?
5. In what way, big or small, can you apply this text to your own life this week ?

STEP 4:

Close in Prayer
